

KEVIN ALIBERTI

218 Sand Springs Road Williamstown, MA 01267 ♦ C: (413)-884-2367 ♦ kevinliberti@gmail.com

SKILLS

HTML / CSS / JavaScript / Python
Database Design & Management
Object-Oriented Programming

React.JS
Git / Collaborative Development
Stata (statistical software)

TECHNOLOGY SUMMARY

Aspiring web & software developer and designer mainly focusing on front-end development, while having a solid understanding of back-end processes as well. I am rapidly learning more in both areas every day. I have a distinct appreciation of the importance in working with data and developing interfaces that create seamless user experiences.

Solid fundamental understanding of full-stack web development

- Have a birds-eye-view of how websites are built and deployed from the ground up
- Strong skills in HTML5/CSS3 with relevant tools such as Sass, Grid / Flexbox, and Bootstrap
- Growing understanding of single-page applications and creating React.JS applications

Database design and management/maintenance skills

- Able to build efficient databases from the ground up through both GUI and SQL methods
- Understands syntax and data types
- Able to query and sort data with multiple table joins
- Understands importance of data integrity when designing and maintaining databases

WORK HISTORY

01/2019 – Current Technical Developer & Co-Founder for Early Startup

Prediction Money, Inc

- Formulated business plan with boss
- Worked alongside experienced back-end programmer to bring early startup visions to a reality
- Developing ways of creating an optimal user experience to ensure more people sign up for site, stay active on the site, and come back to the site more than just a few times
